Acid-base Equilibria and Calculations

Grooves. Twin helical strands form the DNA backbone. Another double helix may be found tracing the spaces, or grooves, between the strands. These voids are adjacent to the base pairs and may provide a binding site. As the strands are not symmetrically located with respect to each other, the grooves are unequally sized.

DNA - Wikipedia

ACID are desirable properties of any transaction processing engine. A DBMS is (if it is any good) a particular kind of transaction processing engine that exposes, usually to a very large extent but not quite entirely, those properties.

ACID and database transactions? - Stack Overflow

How to Acid Wash Concrete. Acid washing, also known as acid etching, prepares a concrete surface to accept a sealer. You can also use acid in weaker concentrations to remove white mineral deposits (efflorescence) and heavy grime. Acid...

How to Acid Wash Concrete - wikiHow

Hypochlorous acid (HClO) is a weak acid that forms when chlorine dissolves in water, and itself partially dissociates, forming hypochlorite, ClO^- . HClO and ClO^- are oxidizers, and the primary disinfection agents of chlorine solutions. HClO cannot be isolated from these solutions due to rapid equilibration with its precursor. Sodium hypochlorite (NaClO) and calcium hypochlorite ($\text{Ca}(\text{ClO})_2$...

Hypochlorous acid - Wikipedia

The timeworn and pedestrian answer is simply "to get to the other side." Here are some creative and original answers: The chicken crossed the road.

QUESTION Hi-Flowâ„¢ control valves call out ANSI B16.104 Class IV flow leakage. What does this mean?
ANSWER ANSI B16.104 is a testing specification for control valves. This specification has actually been superseded by ANSI/FCI 70-2 Class IV. The class IV designation defines the allowable amount of leakage through the valve seat in the closed position.
