Study the material presented in The Biology of Prenatal Development DVD at your own pace using the interactive supporting materials on this page. DVD Documentation includes the program script, footnotes, bibliography, appendices, and index of terms. Read the script in 92 languages by using the Choose Language drop-down menu and clicking Refresh.

Documentation Center for The Biology of Prenatal

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

Life Background. Joseph Campbell was born in White Plains, New York, on March 26, 1904, the son of Josephine (née Lynch) and Charles William Campbell. He was from an upper-middle-class Irish Catholic family. During his childhood, he moved with his family to nearby New Rochelle, New York. In 1919, a fire destroyed the family home in New Rochelle, killing his grandmother.

Chapter Questions
1) Which of the following statements about hormones is incorrect?
a) They are produced by endocrine glands.
b) They are chemical messengers that diffuse or travel in the blood.
c) They are carried by the circulatory system.
d) They are used for communication between distant organs.
e) They have specific biological responses from target cells.
Answer: c

2) The number of hormone receptors changes in the amount of stimuli. Which organism is this not?
a) An organism in a pond
b) An organism in a pond
c) An organism in a pond
d) An organism in a pond
e) An organism in a pond
Answer: c
