MODELS FOR PRESSURE DROP AND HEAT TRANSFER IN AIR COOLED

ABSTRACT. Due to the wide range of design possibilities, simple manufactured, low maintenance and low cost, cross-flow heat exchangers are extensively used in the petroleum, petrochemical, air conditioning, food storage, and others industries.

Effectiveness-ntu computation with a mathematical model

Tipuri constructive ϵ clasificări. După modul de transfer termic schimbătoarele se împart în schimbătoare de suprafață, la care transmiterea căldurii se face printr-un perete despăritor, considerată suprafață de separație, cu o conductivitate termică cât mai mare ϵ schimbătoare prin amestec, la care transmiterea căldurii se face prin amestecul mediilor.
