A rare-earth element (REE) or rare-earth metal (REM), as defined by IUPAC, is one of a set of seventeen chemical elements in the periodic table, specifically the fifteen lanthanides, as well as scandium and yttrium. Scandium and yttrium are considered rare-earth elements because they tend to occur in the same ore deposits as the lanthanides and exhibit similar chemical properties.

The Very First Earth Day Celebration... The founding of Earth day began in San Francisco, California in 1969 at the urging of a man named John Mc Connell who proposed the idea to the city's board of supervisors. Approved by the board, the idea was further supported by U. N. Secretary General U Thant, famed anthropologist Margaret Mead, and many others who helped it spread worldwide.
