Proposed Syllabus For B.Tech Program in Materials Science and Metallurgical Engineering By C.S.J.M.University,Kanpur

Proposed Syllabus For B.Tech Program in Materials Science

The earliest graphics known to anthropologists studying prehistoric periods are cave paintings and markings on boulders, bone, ivory, and antlers, which were created during the Upper Palaeolithic period from 40,000 to 10,000 B.C. or earlier. Many of these were found to record astronomical, seasonal, and chronological details.

Graphics - Wikipedia

The design and implementation of computer programs to solve problems involve skills that are fundamental to the study of computer science. This includes the development and analysis of algorithms and fundamental data structures, and the use of logic and formal methods.

I am a member of the Data Management, Exploration and Mining group in Microsoft Research Redmond. I work on various aspects database systems, mostly related to data integration and transaction processing. Currently, I am working on a distributed systems programming framework, called Orleans, which was released as open source in January, 2015 and is widely used inside and outside Microsoft.

In probability and statistics, density estimation is the construction of an estimate, based on observed data, of an unobservable underlying probability density function. The unobservable density function is thought of as the density according to which a large population is distributed; the data are usually thought of as a random sample from that population.

Density estimation - Wikipedia

Concurrent Engineering: Research and Applications (CERA) is a leading, peer reviewed journal publishing the newest and most exciting research arising from parallelism of product life cycle functions, covering: New developments in computer-aided concurrent engineering (CE) presented by leading CE specialists from around the world
