Proven Strategies for Addressing Unconscious Bias in the

Human embryonic development, or human embryogenesis, refers to the development and formation of the human embryo. It is characterised by the process of cell division and cellular differentiation of the embryo that occurs during the early stages of development. In biological terms, the development of the human body entails growth from a one-celled zygote to an adult human being.

1 1 Please note that we use Dan Siegel’s definition of mind. In Mindsight (2010, p. 52), he writes: “The human mind is a relational and embodied process that regulates the flow of energy and information.” Late one night a police officer sees a man on his hands and knees searching the ground near a streetlight.
