

Gec Cdg Relay Manual

INTRODUCTION

The purpose of the protective relays and protective relaying systems is to operate the correct circuit breakers so as to disconnect only the faulty equipment from the system as quickly as possible, thus minimizing the trouble and damage caused by faults when they do occur. Relays have revolutionized protection.

Relays are associated with each major component of the power distribution system to detect various forms of distress associated with those components. If one of those relays operates (which means that an output contact closes because the relay detects a level of distress in excess of its calibration or setting), it

Relay Selection Guide - store.gegridsolutions.com

In our relay the plug is set to .2 (equals a 500A-earth-fault current). B- The "time-multiplier" is set to 1.0 (setting by a "settingwheel" possible from 0.1 to 1.0). C-Then there is a table on the front-display which gives the relation between "Plug setting multiplier"(scale goes from 1 to 20) versus "Time in seconds" (scale goes from 30 to 2.2).
