Encoder Products Company (EPC) is a leading manufacturer of premium rotary incremental and absolute encoders used for motion feedback. Our encoders are available worldwide to qualified OEMs by direct sales and through a well-trained network of electrical, motion control, and industrial distributors.

greater motor control is desired. The main element of the magnetic motor starter is the contactor, a set of contacts operated by an electromagnetic coil. Energizing the coil causes the contacts (A) to close allowing large currents to be initiated and interrupted by a smaller voltage control signal.
