OCCUPATIONAL BIOMECHANICS DON B CHAFFIN

## **occupational biomechanics don b pdf**

Occupational therapy (OT) is the use of assessment and intervention to develop, recover, or maintain the meaningful activities, or occupations, of individuals, groups, or communities. It is an allied health profession performed by occupational therapists and Occupational Therapy Assistants. OTs often work with people with mental health problems, disabilities, injuries, or impairments.

Human factors and ergonomics (commonly referred to as human factors) is the application of psychological and physiological principles to the (engineering and) design of products, processes, and systems. The goal of human factors is to reduce human error, increase productivity, and enhance safety and comfort with a specific focus on the interaction between the human and the thing of interest.

The Science Three-Level Hypothesized Explanation of the IM effect (McGrew, 2012). Interactive Metronome Â® (IM) is believed to improve the resolution and efficiency of an individual's internal brain clock(s) and temporal processing. In turn, it is hypothesized that this results in more efficient brain connectivity, communication, and synchronization via increased integrity of the brain's white ...
