Fluorine is a chemical element with symbol F and atomic number 9. It is the lightest halogen and exists as a highly toxic pale yellow diatomic gas at standard conditions. As the most electronegative element, it is extremely reactive, as it reacts with almost all other elements, except for helium and neon.. Among the elements, fluorine ranks 24th in universal abundance and 13th in terrestrial ...

Thermodynamics is the study of energy and its conversion from one form to another. It is a branch of physics that deals with the relationships between heat, work, and energy. The first law of thermodynamics states that energy cannot be created or destroyed, only converted from one form to another. The second law of thermodynamics states that the total entropy of an isolated system can never decrease over time. The third law of thermodynamics states that the entropy of a perfect crystal is zero at absolute zero temperature.

Para estudiantes de cursos en Mecánica de Materiales de Ingeniería Mecánica, Civil, o Aeroespacial. Este texto proporciona una presentación clara y completa de la teoría y aplicaciones de la mecánica de materiales. Se examina el comportamiento físico de los materiales bajo carga, y procede a modelar este comportamiento a la teoría del desarrollo.

El programa LCULO de Larson cumple 35 años, una larga historia de innovación en el mercado de cálculo. Ha sido ampliamente elogiado por una generación de estudiantes y profesores por su pedagogía sólida y efectiva que responde a las necesidades de una amplia gama de estilos de enseñanza y aprendizaje y entornos. Sin duda este libro de Larson es un clásico.

Lithium (from Greek: λίθος, translit. lithos, lit. 'stone') is a chemical element with symbol Li and atomic number 3. It is a soft, silvery-white alkali metal. Under standard conditions, it is the lightest metal and the lightest solid element. Like all alkali metals, lithium is highly reactive and flammable, and is stored in mineral oil. When cut, it exhibits a metallic luster, but moist air ...
