Food and Agriculture Organization of the United Nations Rome, 2017 2017 THE STATE OF FOOD SECURITY AND NUTRITION IN THE WORLD BUILDING RESILIENCE

The State of Food Security and Nutrition in the World 2017

World food prices increased dramatically in 2007 and the first and second quarter of 2008, creating a global crisis and causing political and economic instability and social unrest in both poor and developed nations. Although the media spotlight focused on the riots that ensued in the face of high prices, the ongoing crisis of food insecurity had been years in the making.

2007-08 world food price crisis - Wikipedia

The World Food Programme's long experience in humanitarian and development contexts has positioned the organization well to support resilience building in order to improve food security and nutrition.

Here is the text of Newsweek's 1975 story on the trend toward global cooling. It may look foolish today, but in fact world temperatures had been falling since about 1940. It was around 1979 that they reversed direction and resumed the general rise that had begun in the 1880s, bringing us today back to around 1940 levels.

Newsweek on the cooling world - Denis Dutton

A famine is a widespread scarcity of food, caused by several factors including war, inflation, crop failure, population imbalance, or government policies. This phenomenon is usually accompanied or followed by regional malnutrition, starvation, epidemic, and increased mortality. Every inhabited continent in the world has experienced a period of famine throughout history.
