Introducing the Human Brain The human brain is the most complex organ in the body. This three-pound mass of gray and white matter sits at the center of all human activity—you need it to drive a car, to enjoy a meal, to breathe, to create an artistic masterpiece, and to enjoy everyday activities. The brain regulates your body's basic functions, enables you to interpret and respond to ...

The brains of all species are composed primarily of two broad classes of cells: neurons and glial cells. Glial cells (also known as glia or neuroglia) come in several types, and perform a number of critical functions, including structural support, metabolic support, insulation, and guidance of development. Neurons, however, are usually considered the most important cells in the brain.

I love this! Good for you Kate, to take your health seriously and explore all possible options, incl. nixing Social Media for a while. Iâ€™d like to think Iâ€™ve got a pretty good handle on all things Instagram and Twitter, but then again, I only have a small blog and maybe the pressure to be present is very different.
