Preparing Children for a New Baby - UCY

Mottling: A new baby's skin can also look blotchy or mottled. This is especially noticeable if the baby is uncovered or cold. Mottling can also occur if your baby is ill. If your baby's skin color becomes pale or mottled, take her temperature. If it is higher or lower than the normal range, call your baby's doctor.

A Guide to Caring for your Newborn

Colostrum, your first milk, is all your baby needs as long as you feed your baby 8-12 times a day. It is normal for babies to have times when they feed several times in a 4-5 hour period. This "cluster feeding" behaviour does not mean your baby isn't getting enough. It is a natural way to increase your milk supply.
