The IOM examined the quality of cancer care in the United States and concluded that the cancer care delivery system is in crisis due to a growing demand for cancer care, increasing complexity of treatment, a shrinking workforce, and rising costs. Changes across the board are urgently needed. All stakeholders " including cancer care teams, patients and their families, researchers, quality ...

Delivering High-Quality Cancer Care: Charting a New Course

Telomere biology has the potential to extend human life span, to dramatically lower rates of the great remaining killer diseases: heart disease, stroke, and Alzheimer's. All three diseases increase exponentially with age, and their toll will be slashed as we we learn how to address the body's aging clocks. You would think that the 2009 Nobel Prize might have done more to raise the profile ...
